

Linux permissions cheat sheet

Placeholder handout generated for the Academy UI demo.
Not real course material.

$r = 4$ $w = 2$ $x = 1$

644 rw-r--r-- documents

755 rwxr-xr-x programs and directories

600 rw----- private keys and secrets

777 rwxrwxrwx never - this is a finding, not a fix

On a directory: r = list, w = add or delete entries, x = enter
